

WHAT IS CLAIMED IS:

1. A portable device for remotely accessing a computer from a distant location comprising a keyboard processing unit including a keyboard processor having an ASCII encoder and decoder for receiving and transmitting ASCII data, a keyboard, an input output terminal and a modem for connecting the keyboard processor to a wireless telephone communicating device such as a cell phone to permit a wireless telephone interconnection to be made between the terminal keyboard processing unit and a modem in the remotely located computer.
2. A portable device as claimed in claim 1 further comprising an RF modulator and an RF transmitter for permitting wireless transmission to a TV video monitor for displaying and/or editing data files stored in the remotely located computer or for creating new files.
3. A portable device as claimed in claim 2 further comprising a mouse to facilitate the display and/or editing of data files.
4. A portable device as defined in claim 3 wherein said keyboard processor is used to access the Internet through the remotely accessed computer.
5. A portable device as defined in claim 1 further comprising a video monitor for displaying and/or editing of data files stored in the remotely accessed computer.
